**GREAT SPY STORIES FROM FICTION.** Edited by Allen Dulles. Harper & Row, \$6.95

In his foreword, the late Allen Dulles, former head of the CIA, points out that the spy or intelligence agent has become the hero of the 1960's adventure-reading audience, the "new-model musketeer." Mr Dulles, who also edited "Great True Adventures" and other books, contributed enlightening prefaces to each section of this anthology in which the stories are arranged as "The Dangerous German Spy," "Brainwashing," "Spoofs," etc.—as well as introductory paragraphs explaining the backgrounds of some of his selections and something about their authors. He was certainly knowledgeable in espionage fiction, for which he had an admitted fondness. The 32 stories included are notable for the high quality of their authors' writing. Many are episodes discerningly abstracted from novels. Authors range, in time, from Dumas and Doyle to MacInnes, Le Carré and Fleming. A Ken S. Giniger book.
